

Ingenico and TurnCloud launch their brand new Android solution for retailers in Taiwan

Ingenico Group (Euronext: FR0000125346 - ING), the global leader in seamless payments, has announced that it has successfully launched in Taiwan its latest AECR C9 Android solution into major local retail stores such as Far Eastern Department Stores, the only publicly listed department store chain in Taiwan, and Q Square Fashion Plaza (Jing-Jan) near Taipei station.

As consumers' payment preferences have changed and broadened, retailers such as Q Square Fashion Plaza (Jing-Jan) and Far Eastern Department Stores are constantly seeking innovative alternatives to provide more touchpoints to customers and accommodate a wide array of payments preferences. This is where Ingenico and TurnCloud leverage and deliver end-to-end bundled solutions to unlock a new world of limitless possibilities.

Both Q Square Fashion Plaza (Jing-Jan) and Far Eastern Department Stores were seeking a solution to elevate customer checkout experience and offer peace of mind to consumers with customer-facing POS terminals rather than traditional cashier facing Electronic Cash Register (ECR). This consumer-facing display, keeping consumers engaged and able to display promotions and loyalty programs while checking out, encourages repeated purchase.

The Ingenico AECR C9 offers a one shop smart cash register and a secure payment terminal that unlocks the full potential of Android ecosystem and cloud solution, with effortless integration of Android or other Ingenico terminals. This all-in-one solution has a full spectrum of connectivity such as Ethernet, USB host, serial and cash drawer as well as wireless.

Additionally, thanks to TurnCloud Android ECR software, the AECR C9 empowers merchants to provide a more personalized experience by accessing the consumer's purchase history and information while fostering brand trust with consumers by ensuring accuracy and reducing accidental purchase.

Patrick HSU, Ingenico Group Country manager, Taiwan: *"To stay ahead of the game, retailers are constantly exploring ways in operating their business in the most efficient, cost-effective manner. At Ingenico, as a global leader in seamless payments for more than 40 years, we understand retailers' needs and have demonstrated our abilities in delivering devices with Cloud service platform for a complete business management solution for all types of merchants and verticals."*

Vincent Liang, Chairman & CEO TurnCloud: *"Consumer's behaviour is constantly evolving, the way we engage with our customer have to evolve as well. Introducing the new AECR with multiple functionalities which could enhance consumer check-out experiences with a piece of mind as well as strengthening retailers' brand trust."*

* **Ingenico AECR C9** is a new generation Android Electronic Cash Register integrating the concept of Internet Plus with dual 15.6inch touch-screen both cashier and customers facing screens. It also comes with wireless connectivity such as 4G & WiFi, camera and printer. AECR C9 also offers other peripheral attachment options such as barcode scanners or electronic scale

About TurnCloud

TurnCloud is the industry leader for integrating financial technology and retail know-how expertise, utilizing big data technologies, offering a complete end to end solution to our customers.

About Ingenico Group
