

## **SELF SERIES**

Payment solutions designed to meet your self-service requirements

## New challenges in the self-service market

With new economic and sanitary challenges, the payment ecosystem is moving with increasing speed in adopting self-service solutions.

Operators are adapting their payment infrastructure and investing more in self service solutions to meet their consumer expectations. Indeed, consumers desire technology that enables a quicker and more convenient shopping experience with limited interaction.

## 80%

of consumer worldwide are now using contactless, citing safety and cleanliness as key drivers. (source: Mastercard) 73%

of surveyed shoppers prefer retail self-service technologies, such as self-checkout. (source: 2020 Annual connected Retailer Survey-SOTI Survey

## +13.3%

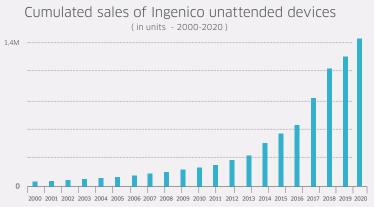

2019-2026 CAGR for the global kiosk market. (source: Fortune Business Insight)

## Ingenico, your trusted partner in self-service

As a pioneer and leader in self-service payments for over 30 years, Ingenico offers a complete range of self-service solutions that are targeted at specific vertical industries use cases (Vending, Retail, Transportation, Parking, Hospitality, and more).

With its new Self Series, Ingenico continues to re-invent the self-service business. Installing and operating unattended payment solutions has never been so easy and secure.

+1,300,000 units sold since 2010

#### Consumer Requirements

#### All payments accepted

As part of the TETRA range, the Self Series leverages one of the largest payment applications portfolio and can accept QR code-based payment thanks to the embedded or optional camera.

#### 📀 Easy to use

The Self Series offers – a colour touchscreen, sound guidance capability, a hybrid reader, and a presence detector for automatic keyboard lighting resulting in a very intuitive and user-friendly interface.

#### Security & Durability

Certified with the latest security standards (PCI PTS v6), the Self Series provides a high degree of security resulting in the operator's peace of mind.

#### **Operator Requirements**

#### Easy Integration

The Self/2000, Self/4000 & Self/5000 all-in-one are very compact terminals which allows them to be easily integrated into kiosks, either from the outside or inside, preserving the kiosk's design.

The Self/7000 & Self/8000 modular devices can be installed in any kiosk as an upgrade from an iSelf configuration or a competitive legacy solution.

#### Robustness

The Self Series is designed for intensive use cases (IK09/IK10/ IK10+). The Self/7000 & Self/8000 are suitable for both indoor and outdoor environments (IP65/IP44). \*If the Self Series Integration Guide best practice recommendations are implemented.

#### Modularity

Integrators can select the right modules to build their desired configurations (MDB, 4G, BT) with future evolution to support a 5G add-on module. These add-on boxes work on any Self Series terminal.

#### Cost-efficiency

High quality & reliability of the Self Series maximizes the solution's availability for customer use. Additional services such as extended warranty and estate management also help reduce the total cost of ownership.

#### Long-term support

Telium 2 or Telium TETRA applications are portable to the Self Series resulting in an optimization of previous development investments.

# The Self Series fits all customer requirements!

### The Self Series can handle your Self-Service business needs

	Self/2000	Self/4000	Self/5000	Self/7000 & 8000

### The Self Series grows your business and ensures long-term revenues with a full set of applications, development tools, and services

**PAYMENT APPLICATIONS |** Leverage Ingenico's existing development tools to reduce overall time to market and integration effort

> +2,500 payment applications: Visa, Mastercard, Amex, CUP, UPI, Discover, Alipay, Wechat

A full package of development and project tools: SDK + Unattended add-on | Ingedev, LLT, Profiling tool, remote debug, trace | PCL APIs for easy integration | Training sessions with experts (remote, on site..)

**ESTATE MANAGEMENT & SECURITY |** Maximize terminal availability and uptime while maintaining full security and control

S & applications download campaign management | remote helpdesk & diagnostics | remote key injection

#### HARDWARE SERVICES PACKAGE | Relief from worrying about payment security complexity

> From consulting service to daily support and maintenance with our Ingenico local experts

### Advanced features for an improved self-service experience

Ruggedized capacitive touch screen (IKO9) **PIN on Glass certified for SCA (Strong Customer** Authentification) on each **SELF** terminal

Hybrid card reader with LEDs providing intuitive

card insertion and steel shutter

16 keys with mechanical backlit PINpad Suitable for visually impaired people

Fully compliant with **EVA** (European Vending Association). EPS (Electronic Payment System) for a standard door module

Embedded 2MP camera for alternative payment method (APM), Barcode scanning, QR codes, digital wallet and loyalty

2 slots for optional add-on boxes according the needs and use-case requirements (4G, Bluetooth, MDB...)

Standard connectors (USB, RS232, LAN)
