

ENVIRONMENTAL POLICY

Ingenico, worldwide leading provider of payment solutions, aims at accelerating its development and at gaining new successes. However, if success is essential, with innovative terminals, solutions and services, the way we do business is of paramount importance.

As a socially responsible company, Ingenico is concerned by the environmental impact of its activities and products, this policy being one of the driving forces behind its innovation.

In order to consolidate and further demonstrate this willingness, Ingenico has set up an Environmental Management System based on ISO 14001 requirements with the following guiding principles:

1. An exemplary compliance with environmental regulation:

Monitor regulation and best practices to allow compliance with all regulatory requirements related to our premises and products, and beyond regulation when relevant;

2. An environmental concern when new products are conceived:

Deploy an eco friendly approach related to our products allowing to measure and reduce the environmental impact during all their lifecycle, and to prevent potential pollution;

3. A purchasing policy with stringent environmental criteria:

Ensure our suppliers integrate an environmental approach; prefer suppliers that will have integrated this approach for their development;

4. An awareness of our employees favoring initiatives:

Continuously improve the environmental impact of our premises and promote our eco friendly approach among our employees.

I will make sure we will have the means to deploy this policy within the entire Ingenico group. Each one of us is required, as part of daily activities, to align with and implement this environmental policy.

Philippe Lazare
Chief Executive Officer
