

INGENICO VENDING

Accelerating self-service
performance

ingenico
GROUP

ENTERPRISE
RETAIL

The vending distribution channel is growing substantially, in a market reinventing itself to support the retail revolution.

Self-service is used in a wide range of sectors, from snacking to the sale of cosmetics or electronic products, and represents a key point of interaction in the customer experience.

Trends

67% of payment cards in France in 2018 are contactless. Objective 100% in 2020

35% growth expected between 2018 and 2022 for smart vending machines (equipped with PC)

€2 BILLION global turnover for the self-service sector in 2018

Ingenico and the vending market

+200 millions vending transactions managed each year

+20% revenue for Ingenico clients thanks to the implementation of contactless payment solutions

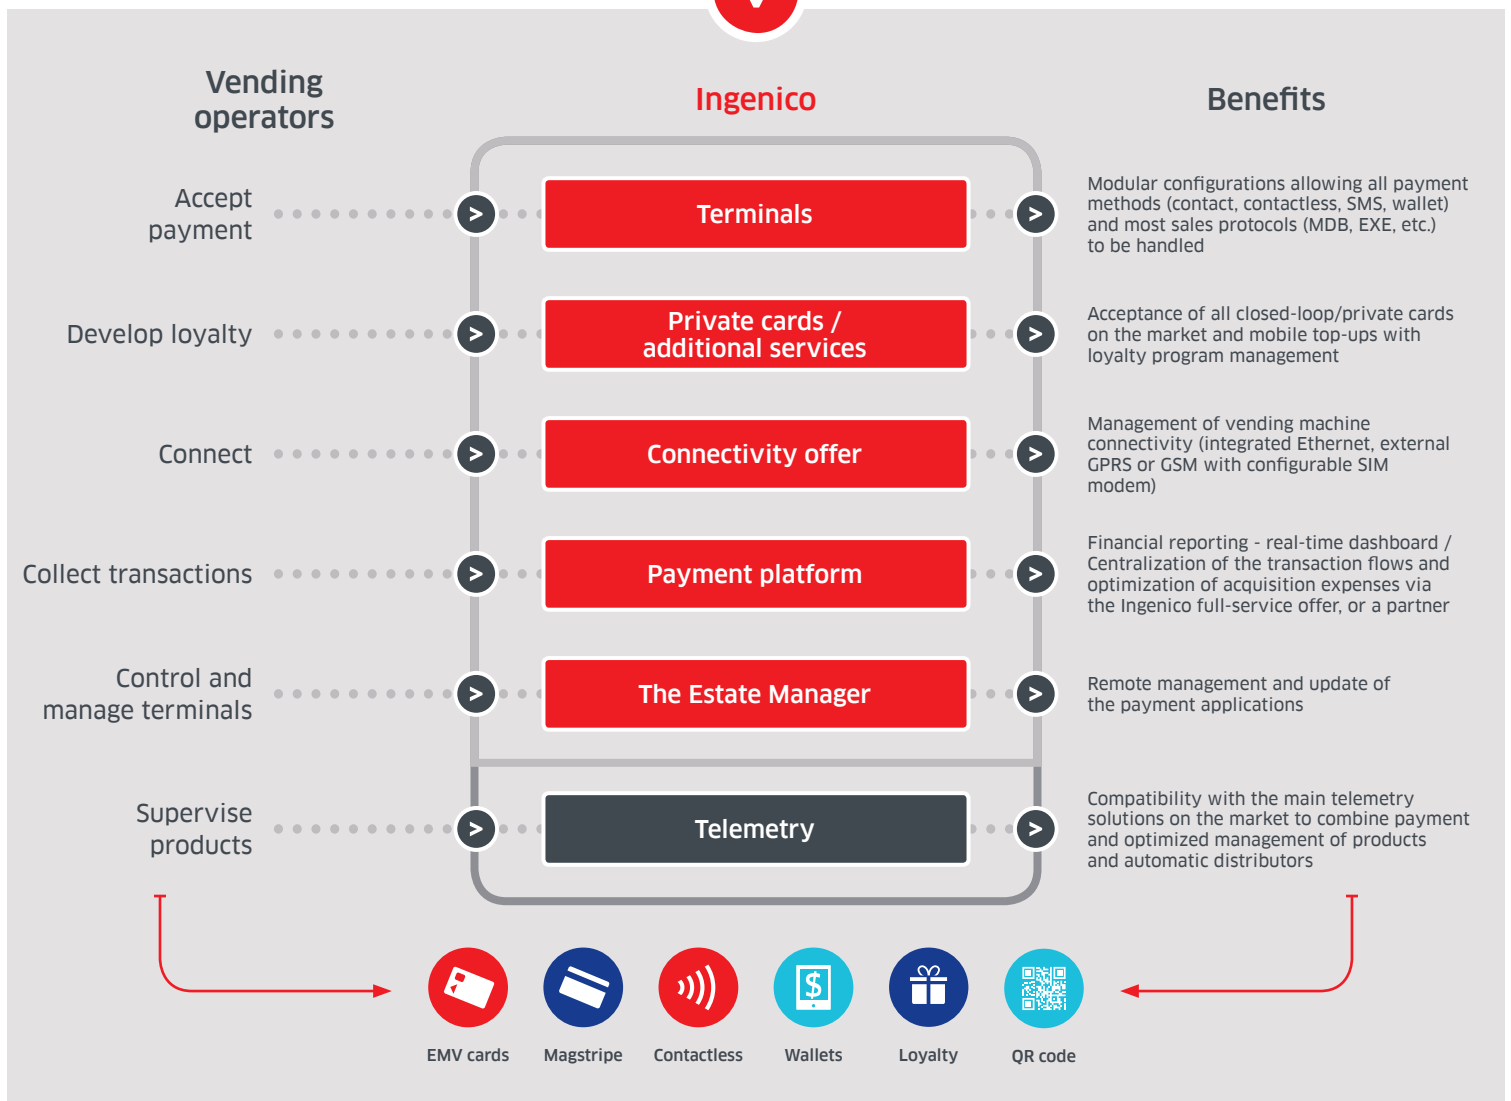

+70% vending terminals deployed between 2016 and 2018

Ingenico vending solutions

Ingenico solutions are **compatible with the most commonly-used payment methods** (bank cards, private cards, smartphones, connected objects). They offer a unique user experience, allowing optimized management.

A complete and flexible offer: payment and acquisition platforms and terminals. Combined with the main telemetry solutions on the market, this offer establishes Ingenico as a preferred partner for vending operators, in order to optimize the performance and the profitability of their distributors.

iSelf Series

The Ingenico vending terminals

The **iSelf** range includes payment acceptance terminals and dedicated accessories which can be adapted to all self-service configurations. Flexible, solid and easy to use, these terminals have the highest level of certified security.

- **Only range certified** for EMV and local schemes (CB, C-Tap, CB2, Redsys, etc.)
- **PCI PTS certification and EVA compliance**
- **The largest portfolio** of payment applications on the market (Class 5.5, ExpressPay, ApplePay, Alipay, SamsungPay, WeChat Pay, etc.)
- **Independence with regard to purchasers**

Connected screens: where vending and retail meet

Include the Think & Go contactless payment solution into your screens

Ingenico is an innovator in the self-service world, **with the first connected screens integrating payment targets**, an immersive experience allowing:

- Simpler and smoother purchases
- The creation of new omni-channel usages (drive to store, promotions, donations, etc.)
- More interactions with a wider range of connected objects (bank cards, smartphones, smart watches, etc.)
