iSMP4
The complete payment solution to revolutionize enterprise mobility

- Connect through a variety of options with support for integrated and semi-integrated configurations
- Get enterprise-grade reliability with a long-lasting battery and barcode scanner
- Experience the first enterprise mobility solution with purpose-built accessories and OEM integration options
- Provide the best user experience with a 2.8" large backlit color display, and an illuminated EMV slot
Designed from the ground up for all-purpose mobile use, the iSMP4 can be connected with a tablet or smartphone to create a secure, smart, mobile point of sale (mPOS) system.

Universal mobility and payment acceptance
The lightweight iSMP4 makes payment on the go easy. Compatible with all payment methods (EMV chip & PIN, magstripe, NFC/contactless), it supports a wide range of payment use cases and can be used as a companion, integrated, or stand-alone device.

User-friendly and ergonomic design
Designed for a professional use, the iSMP4 includes a 2.8” backlit large color display, to provide an optimal user experience—even in bright outdoor environments — and an illuminated EMV slot that guides consumer interactions.

Universal tablet enclosure
The accompanying universal tablet enclosure provides businesses with the flexibility to fit a variety of 8” tablets without restricting merchants to a single device. At a total weight of under 1kg, the enclosure allows associates to carry and use the iSMP4 and tablet in one hand, with a center gripping point and easy access to the iSMP4’s barcode scanner and the tablet’s camera.

Enterprise-grade performance and security
The iSMP4 handles the most demanding and fast-paced environments. Equipped with an optional 1D/2D commercial grade barcode scanner with laser-aiming technology, it reliably scans loyalty cards, coupons, barcodes, QR codes, and even driver’s licenses.

Its long-lasting 2000mAh battery adds further durability with support for a full workday, plus it can be easily swapped-out for rapid replacement.

The accompanying multi-bay docking station enable simultaneous data communication and charging of the iSMP4 and a tablet, while providing an advanced locking system to secure all components with a tamper resistant mounting.

Wide range of connectivity and integration options
Built upon the same platform as Ingenico Group’s full featured payment devices, the iSMP4 provides a single integration across all of your payment initiatives. Pair it with virtually any iOS, Android, Windows, or Linux-based device to convert it into a point of sale, and connect via Bluetooth, Wi-Fi, and physical pairing to enable integrated and semi-integrated options.

In addition, its modular design and 10-pin connector deliver robust physical connectivity for power and data communication, enabling integration with third-party mobile devices, cases, stands, and docks.

The iSMP4 is supported by our Cloud Services

Main processor
- RISC 32-bits ARM9 processor - 380 MHz 450 MIPS

Crypto processor
- RISC 32-bits ARM7 processor - 57 MHz 50 MIPS

Memory
- SDRAM: 32 Mb, Flash: 128 Mb

OS
- Torium 2

Mobile OS
- iOS: 4.x and above. Windows: Win7, Win8 (x64, x64).

Card readers
- SCR: Standard (ISO7816, EMV L1 certified) - 300k lifespan
- MSR: Standard (ISO 7810, 7811 and 7813, T 1/2/3) - 300k lifespan
- Contactless reader: Standard (ISO 14443 A&B, NFC)

Display
- Color QVGA, backlit, 320x240, 2.81 in. (71mm)

Keypad
- 16 keys and 4 functions keys, 2 barcode buttons, physical, tactile ADA compliant, backlit

Contactless
- LED Yes - green or multicolor for Visa payWave support

Connectivity
- Wireless: Bluetooth Class II with 128-bit encryption, Wi-Fi
- Wired: USB C, 10 pin PDA-style connector

Barcode reader
- 1D/2D all major standards supported, laser-aiming feature (Factory option)

Battery
- Field removable Li-ion 2000 mAh

Weight
- 187 g (6.6 oz)

Environment
- Operating temperature: -10°C to +45°C (non charging) / 0°C to 40°C
- Storage temperature: -20°C to +55°C
- Operating humidity: 85% RH at +40°C

Accessories (options)
- Tablet enclosure for iPAD mini 4
- Multi-bay docking stations for iSMP4
- Multi-bay docking stations for tablet enclosure
- Other accessories & integrations developed with partners

Security
- PCI PTS 4.x, supports multiple P2PE schemes
