Move/5000
The perfect business companion for in-door and outdoor mobile businesses

- Enhanced customer engagement on the shop floor
- Sleek design for high-end environments
- Intuitive interface for best-in-class user experience
- Never disconnect via automatic network switching

ingenico
a Worldline brand
Designed for both indoor and outdoor use, the compact Move/5000 is the perfect business companion for hospitality, high street and small merchants, creating a seamless shopping experience that's free from the checkout.

**Fast introduction with Telium TETRA OS**

The Telium TETRA OS integrates with existing payment methods to ensure a seamless introduction into a business’ payment environment. Merchants also have greater control over the payment experience that they’re offering customers by utilising useful HTML5 applications.

**Alternative payment methods**

From mobile wallets to traditional payments schemes, Move/5000 has it covered. The Move/5000 contains payment hardware such as NFC couponing, chip & PIN, swipe and sign, contactless and more to facilitate the processing of alternative payment methods – including those enabled by camera, like QR codes.

**Highest security**

The Move/5000 is certified and fully compliant with the latest global and local PCI regulations. The Telium TETRA OS has been future-proofed with top-of-the-line cryptography software and Ingenico’s world-class peer-to-peer encryption technology to keep data safe.

Maximized network availability

Even on the go, those using the Move/5000 terminal will have strong connections to the internet. That’s because this terminal utilises a wide range of wireless connectivity options and automatic network switching between 4G, 3G, 2G, Dual SIM, Bluetooth and WiFi – all fully optimised so that connection will always be viable.

**Optimal user-experience**

This terminal is dynamic by design, and its intuitive user interface – including powerful multimedia capabilities and a large 3.5 inch colour touchscreen – creates an optimal experience for customers. Its new and ultra-responsive rubber keypad improves PIN entry for customers.

**Compatible with Ingenico’s suite of services**

Keeping the solutions connected, the Move/5000 works in unison with Ingenico’s supporting service platforms, meaning merchants will have access to business services such as back office reporting and e-receipt management. Software updates and day-to-day support deliver a hassle-free experience for those using this innovative range.

The Move/5000 is supported by our Cloud Services
