

## Universal Payment Mount

Seamless installation  
of any payment device

# The universal solution for payment device mounting

Co-designed by Ingenico and leading stand manufacturers, this standard mounting pattern solution provides a universal fixture to easily install any payment device on a stand. Introduced alongside Ingenico Group's new Lane/7000, the pole mount makes it easy to swap payment devices, simplify your checkout environment, and meet PCI-DSS security requirements.

A standard-pattern mounting solution (compatible with Ingenico Group's entire Lane Series)

An ergonomic stand for user-friendly installation and device swapping

An integrated security lock based on Kensington key solutions
