

Payment Solutions for Travel Platform **Datalex**

Combining Datalex and Ingenico ePayments creates a global e-commerce solution to offer its customers an integrated solution through the Datalex Payment Platform. Providing shorter time-to-market and increasing revenue opportunities for its global customers.

Scalable, secure and reliable

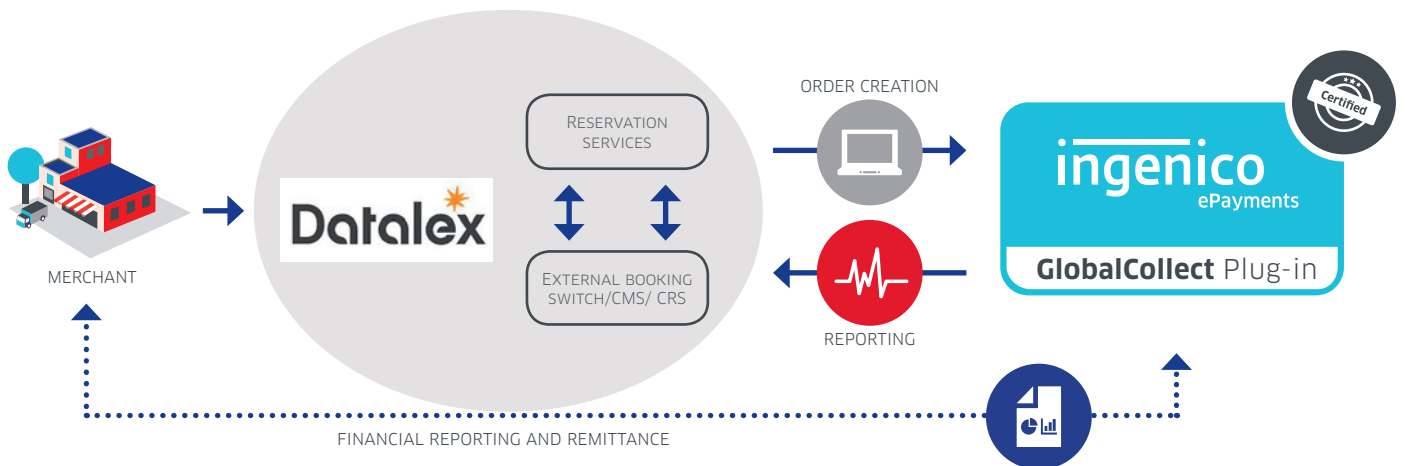

Whatever your expansion strategy is, a secure technology backbone allows you to grow with confidence. State-of-the-art data centers across the globe are readily available for you to plug into. We ensure optimal performance, security and uptime even during seasonal peaks, so you can focus your resources on your strategic initiatives.

Superior growth, superior economics

Launch new sites faster, across channels, geographies and brands without purchasing additional licenses and investing in more infrastructures to support your growth. Our pricing model is predictable, transparent and aligned to your business goals. This keeps us focused and accountable to your ongoing success. There are no hidden fees. No surprises. With a total cost of ownership that is half the cost of licensed software, the superior economics are clear.

Datalex Connection to Ingenico ePayments

Within the Datalex Payment Pages, a bridge to Ingenico ePayments is integrated.

This includes:

- Card processing and authorization
- Authentication (3DS)
- Fraud screening
- Level 3 data support
- (Partial) refunding of payments

Implemented payment products:

- Visa
- MasterCard
- Amex
- Discover
- JCB
- Maestro
- Solo

The integration explained

The Datalex Payment Platform integration has been designed, build, tested and certified based on the best practices of both Datalex and Ingenico ePayments. The checkout process is enriched with a payment product choice, level 3 data and processed via Ingenico ePayments network of acquirers and payment product providers. This includes capture payments, installments, fraud handling and error handling. The payment status is automatically updated into the PNR, and shown in the payment web console.

Integrated features:

- Card Verification (CVV)
- Card fraud screening
- PCI-DSS compliant
- Tokenization
- One-off (PNR)
- (Partial) Refunds
- Level 3 data support
- Payment reporting
- Authentication (3DS)
