ONLINE PAYMENTS / ONE-STOP SOLUTION FOR DIGITAL PAYMENTS

Today more than ever, consumers are switching between online, mobile and POS sales channels.

Ingenico ePayments provides a seamless response to the complexity of payments.

We process online payments quickly and securely. Whatever the channel – online or mobile, our online payment solutions help you to sell more, reach a wider audience and keep your business protected from online fraud.

A MULTI-CHANNEL PAYMENT GATEWAY / OFFER MORE PAYMENT CHANNELS

Our payment gateway provides a secure, online payment platform that makes it easy for your customers to pay and allowing you to accept payments via electronic methods (credit cards, debit cards and bank transfers). Whether you choose to receive funds through us or through one of our acquiring partners, our payment gateway makes sure you are paid.

COLLECT SERVICES / SELL MORE WITH LESS HASSLE

Whether you're looking to expand across Europe on one reliable payment platform, or to manage the payments for existing European entities' under one single contract, our collect services are just the ticket!

Ingenico Collect enables you to offer the preferred payment methods of buyers across Europe. There's no need to open bank accounts or create a new legal entity in each country. All you have to do is choose which payment methods you'd like to accept.

MAIN BENEFITS

- **Increase conversion by offering more payment methods:** when you let your customers choose how they want to pay, they're more likely to complete their transactions. With collect services, you can offer customers across Europe a choice of the payment methods they know and trust.
- **Expand easily into new markets:** if you trade internationally, or you intend to soon, collect services is an obvious fit for your business. With one single contract, you'll have instant access to your buyers' preferred payment methods, placing millions of new customers within your reach.
- **Save time on reconciliation:** instead of juggling different reports, payment cycles and conditions for every activated payment method, you'll receive funds and reports in one single batch. Managing all your payments in this way, from just the one account, your business will save significant time and resource.

FRAUD PREVENTION SOLUTIONS / TACKLE ONLINE FRAUD

Every product, every sector, every country and every business model experiences different fraud patterns. And online fraud keeps evolving. Your business needs its own unique fraud policy to match your strategy and specific needs.

Thanks to Fraud Expert, we offer you a smart fraud protection tool, tailored to the exact needs of your customers' business. Providing two advanced layers of fraud protection, it combines business knowledge with our up-to-the-minute fraud intelligence to create a global risk score – the ideal framework for judging when to block, accept and review.

MAIN BENEFITS

- **Fight fraudsters more effectively:** with the real-time advice of our state-of-the-art technology and cross-merchant online fraud expertise, you can stay ahead of fraudsters and block more of their transactions before first purchase.
- **Maximise revenues:** if you are being targeted, it is natural to impose strict controls – but you can lose honest customers and legitimate business in the process. The smarter way is to filter out genuine fraud with Fraud Expert's industry specific, cross merchant intelligence and watch your acceptance and revenues grow.
- **Save time, money and resources:** suspect transactions can take time to review. Delegate manual review to our experts and reallocate precious resources to core business activity instead – plus have honest customers' orders processed faster.
