Introduction

Thank you for choosing an Ingenico payment terminal.

We recommend that you carefully read this user guide: It gives you the necessary information about safety precautions, unpacking, installation, and maintenance of your terminal.

⚠️ This symbol indicates an important warning

💡 This symbol indicates a piece of advice

Move/5000 terminal with a paper roll

Power Supply

Terminal Base

User Guide

Battery

The power supply unit provided for use with the Ingenico M5000 terminals is specific to the terminal. Do not use any other power supply.
Overview of Move/5000

The Move 5000 is a ‘Multi Comms’ capable device. This means that it is possible to enable multiple modes of communication during the self-install process or at a time more suitable after the self-install process. Only one comms method is required to install the terminal. Although, it is advisable to set up as many methods as possible at the self-install stage.

Please refer to the section ‘Terminal Installation’ for the relevant screens.

Mobile: 2G or 3G GPRS
Bluetooth: Ethernet via a Bluetooth Base
WiFi: Wireless local area networking

Keyboard details and functionality

This is the ‘Menu’ button used to navigate the various terminal menus from the ‘Idle Screen’.
• Each press will display an available menu. It will eventually return to the ‘Idle Screen’.

- Red key cancels the procedure in progress.
- Yellow key cancels the last character.
- Green key validates input selections and information. It also switches the terminal on.

Paper feed (long press)

Some keys can have other functions depending on the applications on the terminal.

Switching ON / OFF terminal

- To switch ON the terminal press on the keyboard.
- To switch OFF the terminal press and hold and simultaneously for 1 second.

Note: The terminal must be off the base/not on charge when attempting to switch it off else it will just restart.

Before using the terminal, always check the paper roll is present.
Terminal Setup

Location of the Move/5000

Place the base on flat surface near an electric socket and if required near to an Ethernet socket.

Place the terminal far from any very hot zones; protect it from vibrations, dust, damp and electromagnetic radiation (computer screen, anti-theft barrier etc.).

Operating Condition

<table>
<thead>
<tr>

Terminal Connections

µUSB

- There is a Micro-USB connector on the left side of the Move/5000 wireless terminal. (see picture). This connector manages Host and Slave connections.
- The terminal supports USB keys with FAT16 or FAT32
- The USB key has to be used with a USB adapter (refer to accessories section)

µSD Memory Card

- There is a MicroSD connector on the left side of the Move/5000 wireless terminal. (see picture). Insert the MicroSD memory card into the connector slot shown on the picture.
- The terminal supports MicroSD cards up to 32GB.

NOTE: The slots; are only used in production; they are NOT currently supported by the terminal applications.
Opening the back cover

Switch off the terminal before opening the back cover

Turn the terminal over and unclip the back cover by pushing on the clip in the direction of the arrows in the picture

SAMs & SIMs

- The connector modules security SAM / SIM are located inside the terminal in a closed compartment
- SAMs / SIMs are identified by the engraved marks on the lower housing
- When introducing a SAM / SIM in its slot, be sure to put the cut corner as indicated on the engraved markings.
Battery

Main Characteristics

Operating Conditions

<table>
<thead>
<tr>
<th>Characteristics</th>
<th>Li-ion 2900 mAh</th>
</tr>
</thead>
<tbody>
<tr>
<td>Charge</td>
<td>5V 1.5A</td>
</tr>
<tr>
<td></td>
<td>50% capacity in 1.5 h; full capacity in 4 hours</td>
</tr>
</tbody>
</table>

The battery capacity depends on the model of terminal and its use

Installing the battery

⚠️ Check that the terminal is not connected to the mains electricity network

- Turn the terminal over and unclip the back cover by pushing on the clip
- Take the battery pack included in the box
- Locate the battery pack connector beside the battery compartment
- Plug the battery pack into the battery pack connector
- Verify that it locks
- Place the battery pack in its compartment.
- Close the back cover
Charging the battery

When does the battery need to be charged?

- On initial startup the battery, should be charged for 4 hours under the environmental conditions stated earlier in this guide.
- When used daily on battery power only. The terminal will automatically recharge its battery each time it is placed on its base.

How can the battery be charged?

Using the base
- Place the terminal on its base, charging will automatically begin.

Using the terminal power supply
- Connect the terminal power supply unit, to the terminal charging port on the left of the terminal.
- The battery symbols are:

  - Battery charge greater than 80%
  - Battery charge greater than 60% and less than 80%
  - Battery charge greater than 40% and less than 60%
  - Battery charge greater than 20% and less than 40%
  - Battery charge less than 20%
  - Terminal powered by external power supply, battery full charge

- The environment in which the charge takes place influences battery lifetime and autonomy (number of transactions)
- The optimal conditions are as follows:
  - Charge away from any external heat source (radiator, sun, enclosed area etc.)
Replacing the battery

It is imperative to use a battery authorized by Ingenico. There is danger of explosion if the battery used is not approved by Ingenico.

- Remove the terminal from its base
- Turn it off by pressing \( \square \) and \( \square \) simultaneously for about one second
- Remove the back cover (see section ‘Installing the battery’)
- Carefully disconnect battery, following the instructions below
  a) Unlock the connector by pressing the locking mechanism as indicated by F1 arrow while pulling this connector (F2 arrow) Release traction on it as soon as the connector comes unclipped
  b) Finish extracting connector by tilting it slightly (F3 arrow) to bring it away from the terminal housing
- Initialise the terminal for a replacement battery (*) by placing it on its base, or connecting the terminal to a power supply without a battery installed
- Connect and install the new battery by following the instructions in ‘Installing the battery’
- Close the back cover and charge the new battery. See ‘Charging the Battery’
- In order to preserve the environment, dispose of the used battery at an appropriate site in compliance with recycling legislation

(*) The terminal recognises that there is no battery when powering up. It will then correctly perform a full recharge with the next battery installed.
R40 Paper Roll

Main characteristics of Ingenico paper roll:

<table>
<thead>
<tr>
<th>Colour</th>
<th>White</th>
</tr>
</thead>
<tbody>
<tr>
<td>Width</td>
<td>58 mm</td>
</tr>
<tr>
<td>Diameter</td>
<td>40 mm</td>
</tr>
<tr>
<td>Length</td>
<td>Approximately 18 meters</td>
</tr>
</tbody>
</table>

The quality of the thermal paper can be deteriorated by poor storage conditions; it is therefore recommended that the following are avoided:

- Storage in hot wet places (near air-conditioners, humidity above 85%)
- Exposure to sunlight or ultraviolet for long periods
- Contact with organic solvents (solvent type adhesives)
- Direct contact with materials containing plasticizers (PVC transparent folders or envelopes)
- Direct contact with “diazo” papers
- Direct contact with water
- Rubbing or pressing the paper too strongly

For best performance, use only heat sensitised paper roll approved by Ingenico. The use of non-approved paper is likely to damage the printer
Installing a Paper Roll

- Open the paper compartment by lifting the catch located at the rear of the terminal and pull the cover to the rear of the terminal.

- Insert the paper roll in the compartment following the directions shown in the picture

- Pull the paper up to the top of the terminal

- Hold the paper and close the lid

- Press simultaneously on both upper corners of the paper flap, as shown by arrows on picture, until it clips into position

When a new paper roll is inserted, tear off the first length (one complete turn) to avoid printing on the residue of the adhesive tape
Terminal Base Overview

Two types of bases available: ‘Charging Base’ and a ‘Bluetooth Base’

**Charging Base:** Is only capable of charging the terminal battery.

---

**Note:** There are **NO** ports on the base unit. You should set up your base unit in a convenient location close to a power source.

---

To open the base unit cover, located on the bottom of the base unit, you must unclip an access clip and lift the cover from the base unit. To replace the cover reverse these instructions being sure to engage all the retaining pins before the access clips.
**Bluetooth Base:** Used for charging the terminal battery and has ports to allow terminals to communicate with hosts over Ethernet. It is needed if you want to communicate with the base via BT and then use the LAN to connect to remote host.

You should set up your base unit in a convenient location close to a power source and network point.

To open the base unit cover, located on the bottom of the base unit, you must unclip an access clip and lift the cover from the base unit. To replace the cover reverse these instructions being sure to engage all the retaining pins before the access clips.
Display/Icons

Icons displayed on your terminals display will depend on your terminal type.

Time displayed in 24 hour format with long date format.

Time displayed in 12 hour format with short date format.

Date and time formats can be changed to suit your preference. Please call helpdesk for further information.

Terminal Operation Icons

The following images may be displayed along the bottom of your terminal display. They are a reference to which physical buttons are active at that point in the transaction and may be pressed in place of the physical button.

This is the ‘Ok’ button and is used primarily to confirm or submit data for verification during a ‘Transaction Processing’ or ‘Function Code’. It is also used to select a highlighted item from a menu.

This is the ‘Cancel’ button which; is used to delete all of the data typed in during a transaction, to cancel a transaction at specific times and in some admin operations.

This is the ‘Clear’ button which; is used as a backspace button to delete one character at a time. It is also used to confirm errors during a transaction.

The Move 5000 is a touch screen device. Icons displayed on screen may be pressed instead of their equivalent physical buttons.

NOTE: Touch Screen functionality is NOT available during PIN Entry.
GPRS Terminal Header

Your terminal may be 2G, 3G or combined 2G/3G capable

The mobile network status will be represented by the following icons:

- No icon: No mobile network detected
- [refresh icon]: Searching for a mobile network but has not yet connected to a network
- [2G bar icon]: The terminal is connected to a mobile network but the GPRS session has not yet been established
- [full bars icon]: The terminal is connected to a mobile network and the GPRS session has been established
- [full bars icon] (maximum): Maximum reception level (100%)
- [full bars icon] (75%): High reception level (75%)
- [full bars icon] (50%): Medium reception level (50%)
- [full bars icon] (25%): Low reception level (25%)
- [full bars icon] (<5%): Very low reception level (<5%)

Network provider name is displayed underneath the signal indicator.
Bluetooth Terminal Header

Note: When an icon is white, there is no connection. The Icon will turn **GREEN** when a connection is made.

Terminal header with no connection

Please note that if your terminal is ‘Multi Comms Capable’ it will show all of the above icons. However, if any of the communications methods is disabled i.e. turned off, the symbol will disappear from the display.
The GPRS; Date/Time and battery icons are described in previous sections.

- This is the Bluetooth Icon when the terminal is NOT assigned to a base unit
- This is the Bluetooth Icon when the terminal IS assigned to a base unit
- This is the WiFi Icon when the terminal is NOT connected to a WiFi network
- This is the WiFi Icon when the terminal is connected to a WiFi network
- This is the Network Icon when the terminal is NOT connected to a network via an Ethernet cable
- This is the Network Icon when a network cable IS inserted and a connection is made to a network via an Ethernet cable
Supervisor Functions

Supervisor Code (If configured)

Default Supervisor Code (Prior to the terminal being installed) is 0000

The ‘Supervisor Code’ is designed to limit access to the ‘Supervisor Functions’ configured for certain transaction types or access to certain ‘Function Codes’ on the terminal to those who have access to the code.

Your terminal is shipped with an initial default code of 0000, however during the ‘Self-Install’ process you will be prompted to change it.

If you forget your code, please contact the Helpdesk who will be able to provide you with a temporary code to allow you to reset it to a new value.

The following codes are not valid choices for your Supervisor code:

- Any sequential numeric code of four digits i.e. 1234, 4567 etc or four digits the same i.e. 1111, 3333, 9999 etc.

If you know your password but wish to change it, you may do this by performing a ‘Function 34’, please refer to the section on ‘Function Codes’ later in this user guide.

If your terminal is lost or stolen, you should contact the terminal Helpdesk immediately.

You are strongly advised to ensure that privileged access to your terminal (including access to the ‘Supervisor Code’) is only granted to staff that have been independently verified as being trustworthy.

Voice Referral Password (If configured)

Default Referral Password is 0000

The ‘Referral Password’ is designed to prevent fraud during referred transactions. If your terminal is configured for ‘Referral Password’, you will be prompted during the ‘Self Install Process’ to create a password.

If you forget your password, you will have to contact the helpdesk and they will set your terminal to reset the password back to ‘0000’.
Terminal Installation

Connect the equipment as described above. The following screens may be displayed during the installation of your terminal. This is dependent on your hardware and software loaded onto your terminal:

Please ensure that you leave your terminal powered on at all times in order that it may receive any automatic updates scheduled for it. When not being used for transaction processing, place your terminal on its base unit to ensure the terminal battery remains fully charged.

Bluetooth

The following screens will be displayed; if the terminal is off the base or the network cable is not attached at first installation.

The screens that follow the base assignment are dependent on the terminal capabilities and the software loaded.
Wi-Fi

If your terminal is configured to support multiple comms methods, the following screens will be displayed:

The number of available comms methods may differ from those shown.

To setup your ‘WiFi’ connection, press \textbullet{}\textbullet{}\textbullet{}\textbullet{}\textbullet{} and follow the screens.
If you choose not to setup your ‘WiFi’ connection at this time, press \textbullet{}\textbullet{}\textbullet{}\textbullet{}\textbullet{} to skip the process.

The following screens will help you setup your ‘WiFi’ connection:

Wi-Fi (Automatic Scan)

1. Touch ‘Automatic Scan’ on the screen or press \textbullet{}\textbullet{}\textbullet{}\textbullet{}\textbullet{} to select the highlighted option.

2. The terminal will scan for networks, before displaying a list of all available networks.

3. Touch the required network on the screen to select it.

4. Type in your WiFi password using the stylus and then press \textbullet{}\textbullet{}\textbullet{}\textbullet{}\textbullet{}.

5. Press \textbullet{}\textbullet{}\textbullet{}\textbullet{}\textbullet{} to continue.
Wi-Fi (Manual Scan)

1. Touch ‘Manual Connection’ on the screen or press to select the highlighted option.

2. Type in your SSID using the stylus and then press .

3. Touch the screen to select your ‘Security’ option.

4. Type in your WiFi password using the stylus and then press .

5. This screen will be displayed if the terminal successfully assigns to the network. Press to continue.

Continue from ‘Terminal Configuration’.
The following process will not be visible if your terminal has already obtained a network connection.

To setup your ‘Mobile' connection, press and follow the screens.
If you choose not to setup your ‘Mobile' connection at this time, press to skip the process.

The following screens will show you the progress of your ‘Mobile' connection:

1. The terminal will attempt to obtain a GPRS connection.
2. Terminal requires a reboot. Press and the terminal will reboot.

Your terminal will automatically pick-up the best available network, however if required you may manually select a preferred network. This will ensure that the terminal will always connect to your preferred provider.

Manual Mode is only available after the terminal has been installed and the terminal has returned to the ‘Idle Screen'.
Manual Mode

To enable the ‘Manual Mode’ press until the ‘Application Menu’ is displayed:

1. Touch ‘Network Setup’ on the screen. You will be asked for ‘Supervisor Code’.

2. Touch ‘Mobile’ on the screen and then press to select setup.

3. Touch ‘Set Mode’ on the screen or press to select ‘Set Mode’ if it is highlighted.

4. Current mode is displayed. Press to remain in mode or press to change mode.

5. The terminal will scan for and display a list of available networks.

6. Touch the screen to highlight the required network.

7. Terminal will attempt to register with the selected network.

8. Press to confirm.

The terminal will now remain in ‘Manual Mode’ until you re-select ‘Automatic Mode’.
Terminal Configuration

Connect the equipment as described above. The following screens will be displayed during the configuration of your terminal:

1. Various screens will be briefly displayed as the terminal powers up.
2. Type in your merchant number (provided in your supplier’s welcome letter) and then press  
3. The terminal will attempt to get a GPRS Signal.
4. The terminal will contact the configuration host.
5. Once a connection has been made various files will be downloaded to the terminal.
6. Various file names will be displayed before the terminal disconnects from the configuration host.
7. If prompted confirm the date by pressing  if it is correct, or type in correct date and then press  
8. If prompted confirm the time by pressing  if it is correct, or type in the correct time and then press  

The terminal will power cycle.

The terminal may then contact any/all acquirers for verification.

Type in your preferred ‘Supervisor Code’.

The ‘Logo’ and text ‘AUTH HOST’ will differ for each Acquirer

Asterisks will appear as you type in the code. Press \( \text{ } \) to save the code.

The terminal will contact the configuration host.

Re-type your new ‘Supervisor Code’ and then press \( \text{ } \) to confirm it.

The terminal will upload the status of its applications and print a list of card types that will be accepted.

Press \( \text{ } \) to acknowledge the change.

Terminal will return to the ‘Idle Screen’ if installation is successful.
Card Reading

Chip Card

Insert the card horizontally into the terminal with the chip facing upwards. Leave the card in position throughout the transaction.

Contactless Card

Bring the card firmly up to the active zone above the contactless logo located on the paper trapdoor.
Keep the card close to the contactless logo during the transaction.
The 4 virtual LEDs will light sequentially during the transaction and the terminal will beep when the card is successfully read.

Magnetic Stripe Card

The card can be read either from bottom to top or from top to bottom, with the stripe facing the terminal.
Use a regular movement in order to ensure a reliable card reading.
Transaction Selection

Sale transactions may be initiated from the ‘Idle Screen’ or from the ‘Transaction Menu’.

All other transaction types can only be initiated from the ‘Transaction Menu’ screen.

This is the default ‘Idle Screen’ which, will be displayed once the terminal has been installed successfully.

The logo may differ from that shown in this example.

Start typing in a transaction amount to initiate a ‘Sale’ transaction.

The screen will change to the ‘Amount Entry’ screen as soon as you start typing in the amount.

The icons displayed are dependent on the transaction amount entered and pressed. You may, then be given the option to Present/Insert/Swipe the cardholder’s card.

Alternatively, pressing will display the ‘Transaction Menu’.

Touch the screen to select the required transaction type from the menu. You may need to scroll down the menu to view the required transaction type.

There will be a scroll bar on the right-hand side of the screen if there are more options available but not visible on the display. Simply touch the scroll bar and swipe your finger in the direction you wish the menu to go. Your finger must keep contact with the screen whilst swiping.
Data Input

If it is necessary to enter letters and characters during transactions or ‘Function Codes’ a virtual keyboard will be displayed on the touch screen. Remove the stylus from the underside of the terminal and use it to select the required values. If you have no stylus then you may use your finger or a pen or pencil. Take care **NOT** to press too hard on the display when selecting characters to prevent damaging the display.

Note: Change case or symbols in the same way you would on your mobile telephone i.e. press the ‘shift button’ and the terminal will change to lower case characters or press the ‘Sym’ button and the terminal will display the special characters.

Pressing any of the following buttons during data entry will have the following effect:

- ![Clear](image) Will clear all of the data entered.
- ![Backspace](image) Will act like a backspace i.e. it will clear one character/digit at a time.
- ![Submit](image) Will submit the data entered.
**Additional Prompts**

During transaction processing you may be requested to confirm any/all of the following information. These will only be displayed after ‘Amount Entry’ and only if your terminal has been configured for ‘Gratuity’:

**Confirm Amount**

This screen will be displayed after the transaction amount.

![Confirm Amount](image)

**Add Gratuity**

This screen will be displayed after:

You confirm the ‘Transaction Amount’.

![Add Gratuity](image)

**Transaction Menu**

Press 🔁 at the ‘Idle Screen’ to display the ‘Transaction Menu’.

Scroll through the menu to highlight the required transaction type and then press ➔ to select.

![Transaction Menu](image)
**CNP Transactions**

This transaction type allows you to ‘Key Enter’ the customer’s card details for all the supported transaction types for ‘Customer Not Present’ transactions or as a fallback from a failed card read.

The following example is for a ‘Sale’ transaction.

**CNP Sale**

1. Press 🅱️ at the ‘Idle Screen’ to display the ‘Transaction Menu’ and touch ‘CNP’ on the screen to select it.

2. Scroll through the menu and highlight the required option then press 🅱️ to select it.

3. Enter transaction amount then press 🅱️. Or press 🅱️ to clear all digits or press 🅱️ to clear one digit at a time and type in new value.

4. Start to type in the card number and the screen will change to: The icon displayed will depend on the card number.

5. Type in the ‘Expiry Date’ and then press 🅱️. Press 🅱️ to clear all digits or press 🅱️ to clear one digit at a time and type in new value.

6. Type in the security code from the back of the cardholder’s card and then press 🅱️.

Depending on your configuration, you may be asked to confirm amount or add a gratuity once 🅱️ has been pressed.
Type in the numbers from the cardholder’s Post Code e.g. if Post Code is EH52 5SH, you should enter 525 and then press \(\square\).

The terminal will display the acquirer result. The merchant should press \(\square\) to accept the transaction or \(\square\) to decline it.

Type in the numbers from the cardholder’s Address e.g. if address is 51 High Street, you should enter 51 and then press \(\square\).

The terminal will print a customer receipt. Tear off the customer receipt and press \(\square\) if it is readable or press \(\square\) to reprint the receipt.

The terminal will contact the ‘Auth Host’ for authorisation.

The terminal will print a merchant receipt. Tear off the merchant receipt and press \(\square\) if it is readable or press \(\square\) to reprint the receipt.

Steps 4 – 8 will be repeated for all other transaction types performed as ‘CNP’ from the request to ‘Insert/Swipe/Present’ the cardholder’s card.
**Force Transaction**

If configured, ‘Force Transactions’ will allow the merchant to re-type in the details of stored/authorised transactions if a ‘MAC Key Reset’ was performed.

You will only see the equivalent ‘Force’ transaction type for transaction types enabled on your terminal i.e. If ‘SALE’ and ‘REFUND’ are the only two transaction types, you will only see ‘Force SALE’ and ‘Force Refund’ transactions in the CNP menu.

1. Touch ‘Force Sale’ on the screen to select it.
2. The ‘Force Sale’ menu screen will be displayed. Enter the sale amount and then press 

3. Insert or swipe the card.
4. The terminal will check the card.

5. The terminal will request the auth code from the original transaction. Type in the code and then then press 

6. The terminal will request the PIN code. Cardholder to enter the PIN and then press .
Terminal checks the PIN code against the card.

Remove the card from the terminal.

Press 🔄 if the printout is readable; or press 🔄 to print the cardholder receipt again.

Press 🔄 if the printout is readable; or press 🔄 to print the merchant receipt again.

All 'Force' transaction types will behave in the same manner as their original transaction except they will **NOT** go online to the acquirer for authorisation as they have already been authorised.
Non CNP Transaction Processing
Sale – Swiped Card

Press  at the ‘Idle Screen’ to display the ‘Transaction Menu’.

Touch ‘Sale’ on the screen as described earlier to select it.

Terminal will check the card

This screen will only be displayed if the terminal attempted to connect to the acquirer.

As you type in the transaction amount, it will change to:

This screen will be displayed if ‘Sale’ is selected from the above menu.

Press  to confirm amount or press  to clear all digits or press  to clear one digit at a time and type in new value.

A response to the ‘Sale’ request is returned by the acquirer.

Swipe the cardholder’s card.

The terminal will print the merchant receipt.

Tear off the merchant receipt and press  if it is readable or press  to reprint the receipt.

Ask the cardholder to sign the receipt.
Signature matches one on the card press ☑ if not press ☐ and transaction will be reversed. A customer receipt is printed.

Tear off the customer receipt and press ☑ if it is readable or press ☐ to reprint the receipt.

**Sale – Inserted Card**

Press ☑ at the ‘Idle Screen’ to display the ‘Transaction Menu’ and touch ‘Sale’ as described earlier.

Insert the cardholder’s card as described previously.

This screen will be displayed. As you type in the transaction amount, it will change to:

Terminal will check the card

Press ☑ to confirm amount, or press ☐ to clear all digits or press ☑ to clear one digit at a time and type in new value.

Customer to enter their PIN code and press ☑ to confirm the PIN.
Terminal connects to the acquirer using the configured connection method e.g. ‘Mobile Network’.

A response to the ‘Sale’ request is returned by the acquirer.

The terminal will print the cardholder receipt.

Tear off the cardholder receipt and press 📜 if it is readable or press 📜 to reprint the receipt.

A merchant receipt will be printed.

Tear off the merchant receipt and press 📜 if it is readable or press 📜 to reprint the receipt.
Sale – Contactless

Press \( \square \) at the ‘Idle Screen’ to display the ‘Transaction Menu’. Touch ‘Sale’ on the screen.

This screen will be displayed. As you type in the transaction amount, it will change to:

Press \( \square \) to confirm amount or press \( \square \) to clear all digits or press \( \square \) to clear one digit at a time and type in new value.

Present the contactless card to the terminal as described previously.

Contactless read is successful when all four status lights are lit and confirmation tone is heard.

This screen will only be displayed if the terminal attempts to connect to the acquirer.

This screen will only be displayed if the terminal went online for approval.

Terminal will display the result of the request i.e. ‘Approved’ or ‘Not Authorised’.

Terminal will print the merchant receipt.

Tear off the receipt and press \( \square \) if it is readable or press \( \square \) to reprint the receipt. Press \( \square \) if a cardholder receipt is required.
Contactless High Value Payment (HVP) – Wallet Payments

High Value Payments are contactless payments that are above the limit for contactless cards (e.g. £30.00) but are protected by the cardholder; verifying themselves to the mobile phone either by the use of a scanned thumb/fingerprint in the case of Apple Pay, or by the entry of a pass code for other mobile phone manufacturers. This process is known as a Consumer Device Cardholder Verification Method or CDCVM for short.

This means that once HVP is enabled, the contactless logo will be displayed on your terminal for all transactions rather than just those under the contactless card limit (e.g. £30.00).

Acceptance of normal contactless cards for transactions below the £30 limit will continue as normal and, if a cardholder taps a contactless card for a transaction above the £30 limit, the terminal will instruct them to complete the transaction using chip and PIN.

In some cases, a cardholder may need to tap their mobile phone against the contactless reader twice. This is because they have not pre entered their CDCVM on their device prior to starting the transaction and their device has prompted them to complete their CDCVM and tap the phone again. The cardholder should follow the instructions on their device to complete the transaction.
Sale with Gratuity

If your terminal is configured for ‘Gratuity’, the following additional screens will be displayed after the ‘Confirm Amount’ prompt during a ‘SALE’ transaction:

**Gratuity Amount**

Press 🔄 if you wish to add a ‘Gratuity’.

Press 🚪 if you do not wish to add a ‘Gratuity’.

Press ✗ to cancel the transaction.

Type in the ‘Gratuity Amount’ e.g. 120 for £1.20 and then press 🔄 to submit it.

Press 🚪 to clear one digit at a time or press ✗ to clear all digits.

Press 🔄 to confirm amount or press 🚪 to reject the amount and go back to the above screen. Press ✗ to cancel the transaction.

**Gratuity Percentage**

Press 🔄 if you wish to add a ‘Gratuity’.

Press 🚪 if you do not wish to add a ‘Gratuity’.

Press ✗ to cancel the transaction.

Touch the screen to highlight the gratuity percentage you wish to add and then press 🔄 to select it.

Press 🔄 to confirm amount or press 🚪 to reject the amount and go back to the above screen. Press ✗ to cancel the transaction.

The transaction flow will continue as per a normal ‘Sale Transaction’.
Refund

Press 🔄 at the ‘Idle Screen’ to display the ‘Transaction Menu’ and touch ‘Refund’ on the screen.

As the refund amount is typed in the screen will change to:

Press 🕰️ to confirm amount or press 🚪 to clear all digits or press 🕰️ to clear one digit at a time and type in new value.

Present/Insert/Swipe the cardholder’s card on the terminal.

Terminal will check the card to ensure it is valid.

Merchant will type in their supervisor code and then press 🕰️.
Terminal will connect to the acquirer host for approval.

The result of the ‘Refund’ from the acquirer will be displayed.
Terminal will print the merchant receipt.

Tear off the merchant receipt and then press 🕰️ if it is readable or press 🚪 to reprint the receipt.

Remove the card from the terminal.
Check the customer signature against the one on the card.

If the signature matches the one on the card press 🕰️ or press 🚪 if it does NOT match and refund will be reversed.
Prints cardholder receipt. Tear off the cardholder receipt and press 📞 if it is readable or press ⌘ to reprint the receipt.

Terminal returns to the ‘Idle Screen’.
Refund with Gratuity

If your terminal is configured for gratuities the ‘Refund’ transaction flow is as follows after you select ‘Refund’ from the transaction menu as described previously in this manual:

1. Press ▷ to submit TOTAL amount.
   Press ◯ to change one digit at time or press ◯ to clear the entire amount and enter the correct amount.

2. Present/Insert/Swipe the cardholder’s card or press ◯ to cancel the transaction.

3. The terminal will check the cardholder’s card.

4. Type in your ‘Supervisor Code’ and then press ◯.
   Press ◯ or ◯ to correct mistakes.

5. Press ◯ if transaction had a ‘Gratuity’ added or press ◯ if no ‘Gratuity’ was added or press ◯ to cancel transaction.

6. Type in gratuity amount and then press ◯ to confirm amount.
   Press ◯ or ◯ to correct mistakes. Press ◯ again to cancel the transaction.
Terminal will go for authorisation and will display the response from the acquirer.

If prompted to check signature press [ ] if it matches one on the card or press [ ] if it does not. Press [ ] to cancel the transaction.

A merchant receipt is printed. Tear off the receipt and press [ ] if it is readable. Or press [ ] to reprint the receipt.

A cardholder’s receipt is printed. Tear off the receipt and press [ ] if it is readable. Or press [ ] to reprint the receipt.

Remove the cardholder’s card from the terminal.

Terminal returns to the ‘Idle Screen’.

Note: If the card used for the refund does NOT require signature verification the cardholder receipt will be printed before the merchant receipt.
Purchase with Cashback (PWCB)

This menu option is only used to provide ‘Cashback’ where a normal ‘Sale’ transaction has been performed with a ‘Gratuity’. Selecting this option allows a transaction to be carried out with ‘Cashback’ instead of ‘With Gratuity’.

Only certain types of debit cards allow ‘Purchase with Cashback’

PWCB Swiped Card

Press ⬅️ at the ‘Idle Screen’. Touch ‘Purch. with Cashback’ on the screen to select it.

Press ⬇️ to confirm amount or press ⬆️ to clear all digits or press ⬇️ to clear one digit at a time and type in new value.

Type in the transaction amount, the screen will change as the amount is being typed in:

Terminal will check the card to ensure it is valid.
You may be asked to enter the last four digits of the card number.

Type in cash back amount and then press ⬇️ to confirm.
Or press ⬆️ to clear all digits or press ⬇️ to clear one digit at a time and type in new value.

The transaction will now continue as a normal ‘Sale’ transaction.
PWCB Inserted Card

Press ☑ at the ‘Idle Screen’. Touch ‘Purch. with Cashback’ on the screen to select it.

As the transaction amount is being typed in the screen will change to:

Press ☑ to confirm amount or press ☑ to clear all digits or press ☑ to clear one digit at a time and type in new value.

Insert the cardholder’s card or press ☑ to Cancel the transaction.

Type in the amount of ‘Cashback’ required by the cardholder and then press ☑.

The transaction will now continue as a normal ‘Sale’ transaction.

Press ☑ to confirm the amount of Cashback.

Cardholder to enter their PIN code and then press ☑ to confirm the PIN.

Terminal displays asterisks as PIN is typed.

Press ☑ to confirm PIN and ‘Total Amount’.

Cardholder advised to return terminal to merchant after PIN is verified.

Do NOT remove card.
Cash Advance

Please note that this option is only available for certain types of business. Please contact 'Customer Services' for further information.

Only certain types of credit cards allow ‘Cash Advance’.

Cash Advance – Swipe Card

Press ⏯️ at the ‘Idle Screen’. Touch ‘Cash Advance’ on the screen to select it.

1. Press ⏯️ to confirm amount or press ⏯️ to clear all digits or press ⏯️ to clear one digit at a time and type in new value.

2. Swipe the cardholder’s card or press ⏯️ to cancel the transaction.

3. The terminal will check the cardholder’s card to ensure it supports the transaction type.

The transaction will now continue as a normal ‘Sale’ transaction.
Cash Advance – Insert Card

1. Press 🖥 at the ‘Idle Screen’. Touch ‘Cash Advance’ on the screen to select it.

2. Type in cash amount and press ✅ to confirm. Or press 🗑️ to clear all digits or press 🗑️ to clear one digit at a time and type in new value.

3. Insert the cardholder’s card or press 🗑️ to cancel the transaction.

4. Cardholder to enter their PIN code and then press ✅ to confirm the PIN and Amount.

5. The terminal will display asterisks as the PIN is typed in.

6. The terminal will check the cardholder’s card to verify the PIN.

The transaction will now continue as a normal ‘Sale’ transaction.
Reversal

Note: Reversals can only be performed, within 30 seconds of the original transaction completing and before any other function starting.

Press at the ‘Idle Screen’. Touch ‘Reversal’ on the screen to select it.

The terminal will contact the acquirer to reverse the transaction.

The acquirer will send a response to the reversal request.

The terminal will display the response from the host.

The terminal will print a customer receipt.

Press if the printout is readable else press to print the cardholder receipt again.

The terminal will print a merchant receipt.

Press if the printout is readable else press to print the merchant receipt again.

“A reversal is used to correct an error if spotted quickly e.g. amount entered was £1000 but was supposed to be £100. After 30 seconds a refund would be required.

The terminal will print a customer receipt.

If a reversal is attempted after the 30 second window this screen will be displayed. Press to confirm failure.
Pre-Authorisation (Pre-Auth)

Please note that this option is only available for certain types of business. Please contact ‘Customer Services’ for further information.

Where there is a likelihood of a large value transaction, such as a hotel or car hire bill, a ‘Pre-Authorisation’ transaction for the expected value may be made. If, following a ‘Pre-Authorisation’ transaction, the value of the transaction increases (e.g. as a result of an extended stay at a hotel) an additional ‘Top-up’ transaction may be required.

Press  at the ‘Idle Screen’. Touch ‘Pre-Auth’ on the screen to select it.

Insert/Swipe card.

The Pre-Auth menu screen will be displayed. Enter the amount and then press .

Terminal will check the card.

The transaction will now continue as a normal ‘Sale’ transaction, except the header will be ‘Pre-Auth’.
**Top-Up**

**Top-Up – Insert Card**

Please note that this option is only available for certain types of business. Please contact ‘Customer Services’ for further information.

---

If, following a ‘Pre-Authorisation’ transaction, the value of the transaction increases (e.g. as a result of an extended stay at a hotel) an additional ‘Pre-Authorisation’ transaction will be required.

If your terminal is not configured to automatically perform the additional ‘Pre-Authorisation’, you may have to perform a ‘Top-Up’ as follows.

---

2. The Top-Up menu screen will be displayed.
   
   Enter the additional amount and then press ✅.

3. Insert the cardholder’s card into the terminal.

4. Terminal will check the card.

5. Type in the ‘Txn ID’ from original Pre-Auth and then press ✅.

6. Type in the ‘PIN’ and then press ✅. Press ✅ to clear one digit at a time and type in new PIN or press ✅ to Cancel Txn.

The transaction will now continue as a normal ‘Sale’ transaction, except the header will be ‘Top-Up’.
Top-Up – Swipe Card

Please note that this option is only available for certain types of business. Please contact ‘Customer Services’ for further information.

If, following a ‘Pre-Authorisation’ transaction, the value of the transaction increases (e.g. as a result of an extended stay at a hotel) an additional ‘Pre-Authorisation’ transaction will be required.

If your terminal is not configured to automatically perform the additional ‘Pre-Authorisation’, you may have to perform a ‘Top-Up’ as follows.

2. The Top-Up menu screen will be displayed.
   Enter the additional amount and then press .

3. Swipe the cardholder’s card into the terminal.

4. Terminal will check the card.

5. Type in the ‘Txn ID’ from original Pre-Auth and then press .

6. Note there is NO ‘Signature Verification’ for this transaction type.

The transaction will now continue as a normal ‘Sale’ transaction, except the header will be ‘Top-Up’.
Completion

If the final bill is more than 15% higher than the total ‘Pre-Authorised’ amount, an additional ‘Top-up’ transaction will be required for the difference which must be obtained prior to the carrying out of the ‘Completion’ transaction.

The following procedure will complete a ‘Pre-Authorised’ transaction when the final amount is confirmed with the customer.

Completion - Swipe Card

1. Press 🌈 at the ‘Idle Screen’. Touch ‘Completion’ on the screen to select it.
2. Enter the final amount and then press ✅.
3. Swipe the cardholder’s card. You may be asked to key in the last four digits of the cardholder’s card number.
4. Enter first pre-auth code and then press ✅. Enter the code as described previously in ‘Data Input’.
5. You may be asked to enter first Txn ID from Pre-Auth and then press ✅. Enter the code as described previously in ‘Data Input’.
6. Enter Txn ID Check Digit from Pre-Auth receipt, press ✅ to submit value. Use the ▼ or ▲ buttons to correct mistakes.
Completion - Insert Card

1. Press \(^1\) at the ‘Idle Screen’. Touch ‘Completion’ on the screen to select it.

2. Enter the final amount and then press \(^2\).

3. Insert the cardholder’s card into the terminal.

4. Terminal will check the card details.

7. Terminal will check the card details.

9. Cardholder to sign the receipt. Check if they match, press \(^9\) if OK, else press \(^{10}\) to reverse transaction.

3. Terminal will print a merchant receipt. Press \(^{11}\) if the printout is readable; else press the \(^{12}\) button to print the merchant receipt again.

10. Terminal will print a cardholder receipt. Press \(^{13}\) if the printout is readable; else press \(^{14}\) to print the cardholder receipt again.
Enter first pre-auth code and then press OK. Enter the code as described previously in ‘Data Input’.

You may be asked to enter first Txn ID from Pre-Auth then press OK. Enter the code as described previously in ‘Data Input’.

Press OK to submit value; else press the button to edit the text one digit at a time or press C to clear all digits.

Cardholder to enter their PIN. Press the button to edit the text one digit at a time or press C to clear all digits.

Tear off customer receipt. Press OK if the printout is readable; else press C to print the cardholder receipt again.

Remove the cardholder’s card from the terminal.

Tear off the merchant receipt and then press OK.
Account Verification

Account Verification Swipe Card

Press 📡 at the ‘Idle Screen’. Touch ‘Verify Account’ on the screen to select it.

If the account is valid this screen is shown.

Terminal will print the cardholder receipt.

Press 📡 if the printout is readable; or press 📡 to print the cardholder receipt again.

Check Signature, press 📡 if OK.
Press 📡 if not OK.
Press 📡 to Cancel.

Note: If the account is not valid a screen similar to the following will be displayed.

Note: This is a ZERO value transaction. No transaction amount is required.
Account Verification Insert Card

1. Press 🕒 at the ‘Idle Screen’. Touch ‘Verify Account’ on the screen to select it.

2. Insert the cardholder’s card into the terminal.

3. The terminal will check the card.

4. Cardholder to enter the PIN code and then press 🎉.

5. Terminal will connect to the host.

6. If the account is valid this screen is shown.

7. Terminal will print the cardholder receipt.

8. Press 🎁 if the printout is readable; or press 🎁 to print the cardholder receipt again.

9. Remove the card from the terminal

10. Terminal will print the merchant receipt.

11. Press 🎁 if the printout is readable; or press 🎁 to print the cardholder receipt again.

Note: If the account is not valid a screen similar to the following will be displayed.

Note: This is a ZERO value transaction. No transaction amount is required.

**Application Menu**
The ‘Application Menu’ is where the terminal sub menus are controlled from.

Press 🔄 until the ‘Application Menu’ is displayed:

Touch the required option on the screen to select it.
Or press 🔄 to select the highlighted option.

**Totals/Reports**
The terminal can produce a number of reports to aid banking

<table>
<thead>
<tr>
<th>End of Day Banking</th>
<th>Reconciliation report with the acquirers</th>
</tr>
</thead>
<tbody>
<tr>
<td>X Balance</td>
<td>Transaction total print without a reset</td>
</tr>
<tr>
<td>Z Balance</td>
<td>Transaction total print with a reset</td>
</tr>
<tr>
<td>Waiters Totals</td>
<td>Gratuity summary per waiter</td>
</tr>
</tbody>
</table>

- There are several common features across all the totals and sub-totals on all of the reports that are available.
  - DR indicates that the value of transactions shown is in your favour – the value shown will be debited from the customer.
  - CR indicates that the value of transactions shown is NOT in your favour – the value shown will be credited to the customer.
  - The number of transactions that add up to the total shown will always be shown on the left of the value.
  - Any gratuity and cashback amounts are included in the TOTAL and SUB-TOTAL, as well as in the breakdown by transaction type (i.e. Sales or Refunds).
Press \( \text{\textcopyright } \) to display the Application Menu. Touch ‘Totals/Reports’ on the screen to select it. Or press \( \text{\textcopyright } \) to select highlighted option.

Touch the screen to select the required report. Or press \( \text{\textcopyright } \) to select the highlighted option.

Note: You will be asked to enter you ‘Supervisor Code’ to access the ‘Totals/Reports’ option.
Repeat the above steps to select any of the other options from the ‘Totals Menu’.

**X-Totals / Z-Totals**

**X-Totals** are sometimes referred to as an End of Shift Balance report. This is because it allows you to print a total of all transactions performed since the last **Z-Totals** report. **X-Totals** do not reset the totals within the terminal.

**Z-Totals** show the total of all transactions processed through the terminal for each card company since the last **Z-Totals** were performed. Once **Z-Totals** have been completed the totals within the terminal are reset to zero once terminal returns to the ‘Ready Screen’. **Z-Totals** are not connected to your Banking totals.

**Waiter Totals**

The ‘Waiter Totals’ report is printed after the ‘X/Z Reports’. It is not automatically printed; you will be asked if you wish to print them.

The report breaks down the transactions and gratuities by each waiter. Waiter ID is printed on both the merchant and customer copy of the transaction receipts. Waiter ID has a range from 1 to 99, ‘Waiter ID 00’ is the ‘Shared Waiter ID’ normally used for seasonal or part time employees or if you do not wish to specify individual waiters.

If you are looking to set up waiter ID please refer to ‘Purchase with Gratuity’ section of this manual.

The terminal will either print the message ‘WAITER-TOTALS RESET’ or ‘WAITER TOTALS NOT RESET’ depending on which button is pressed before returning to the READY prompt.

**End-of-Day-Banking**

Banking should be carried out at the end of each business day once the last customer has left the premises. This is to make checking credits and reconciliation with your bank statements easier.

**Please Note:** To ensure that your statement totals balance, it is important that you carry out your ‘End-of-Day Banking’ before the cut-off time set by your acquirer. For information regarding these times please contact Customer Services.

Select End-of-Day-Banking as described above in ‘Reports’, the following screens will be displayed:

1. Press ✅ to perform your ‘End-of-Day Banking’ or press ❌ to return to the ‘Idle Screen’.
2. Press ✅ to bank ALL card schemes.
3. Press ✅ to select card scheme to be banked.
4. Press ✅ to go to Waiter Totals.
5. Press ✅ to bank the selected Acquirer.
6. Press ✅ to display next scheme to be banked.
7. Press ✅ to go to Waiter Totals.
8. The terminal will contact each acquirer selected and print a short report.

This screen will be displayed if ‘Waiters’ are configured.

Press ✅ to print report or ❌ to return to the ‘Idle Screen’.

If ‘Waiter Report’ is printed press ✅ to reset totals or ❌ not to reset the totals. Press ✅ to return to the ‘Idle Screen’.

**PLEASE NOTE:** The acquirer selection screen will only be displayed if your terminal is set up with more than one acquirer.

Function Codes
There may be occasions when you have further requirements of your terminal. These can be met using Function Codes.

Function Codes other than the following should only be used on the advice of the Helpdesk.

Entering Supervisor Code
You will be asked on occasions to enter your ‘Supervisor Code’, the following screens will be displayed:

1. Type in your Supervisor Code and then press 0. The screen will display asterisks as characters are typed in.
2. Press  to clear one character at a time. Press  to clear all characters. Press  to confirm.

Function Codes
To access the ‘Function Codes Menu’, you must first go through the ‘Supervisor Menu’. Press the  button until the ‘Application Menu’ is displayed:

1. Touch ‘Supervisor Menu’ on the screen. You will be asked to enter your ‘Supervisor Code’.
2. Touch ‘Helpdesk Menu’ on the screen. The ‘Helpdesk Menu’ will open.
Helpdesk Menu (Print Function Codes)
Access the ‘Helpdesk Menu’ as described above.

1. Touch the screen or press ◄ to select highlighted option.
3. This screen will only be displayed if ◄ was pressed to print the systems codes.

Helpdesk Menu (Select Function)
Access the ‘Helpdesk Menu’ as described above.

1. Touch ‘Select Function’ on the screen to select it.
2. Type in the required function code and press ◄ to select it.
Function 40 Waiter Setup

A ‘Default Waiter ID’ exists to capture the gratuity amount from each transaction if ‘Gratuity’ is enabled on your terminal. However, you may wish to set up individual ‘Waiter IDs’ to record the amount of gratuity each waiter has accrued.

The ‘Waiter Menu’ will allow you to ‘Add, Delete, Print, Change Name, Delete All or Create Defaults.’

Press \( \text{ }^\uparrow \text{ } \) until the ‘Application Menu’ is displayed and enter the Function Code 40 as described previously above.

Add Waiter

1. Press \( \text{ }^\downarrow \text{ } \) to setup waiters or press \( \downarrow \) or \( \rightarrow \) to return to the ‘Idle Prompt’.

2. Touch ‘Add’ on the screen to select it or press \( \rightarrow \) to exit.

3. Start to type in the ‘Waiter’s Name’ as described earlier in this manual. The screen will change to the following:

4. Press \( \rightarrow \) when you have typed in the waiter’s name. The details will be printed.

5. The details will be printed before returning to the ‘Waiter Setup Menu’.

6. Repeat for each waiter to be added. You may set up a maximum of 99 waiter’s names. Press \( \rightarrow \) to exit the menu.
Delete Waiter

1. Return to the ‘Waiter Setup Menu’ as described above. Touch ‘Delete’ on the screen to select it.

2. Type in ‘Waiter Code’ and then press .

3. Press Yes to confirm waiter to be deleted or press No or Cancel to return to the ‘Waiter Setup Menu’.

If Yes was pressed the details of the waiter being deleted will be printed.

Print Waiters

1. Return to the ‘Waiter Setup Menu’ as described above. Touch ‘Print’ on the screen to select it.

2. A list of waiters that have been setup in the terminal will be printed.
Change Name

Return to the ‘Waiter Setup Menu’ as described above. Touch ‘Change Name’ on the screen to select it.

Type in ‘Waiter Code’ of name to be changed and then press 「OK」.

Press 「OK」 to confirm waiter name to be changed or press 「Back」 or 「Cancel」 to return to the ‘Waiter Setup Menu’.

Press 「Del」 to delete the last character of the name or press 「Clear」 to delete the entire name.

Type in the new name as described previously and then press 「OK」 when completed.

The details will be printed before returning to the ‘Waiter Setup Menu’.
Delete All

1. Return to the ‘Waiter Setup Menu’ as described above. Touch ‘Delete All’ on the screen to select it.

2. Press ◊ or press ◄ to exit back to the ‘Waiter Setup Menu’ without deleting the waiters.

3. If ◄ was pressed the terminal will print confirmation that ‘ALL’ of the waiters have been deleted.

Create Defaults

1. Return to the ‘Waiter Setup Menu’ as described above. Touch ‘Create Defaults’ on the screen to select it.

2. Press ◄ to ‘Create Defaults’. Press ◄ to exit back to the ‘Waiter Setup Menu’ without creating the defaults.

3. The terminal will print confirmation that ‘Waiter Defaults’ have been created.

“Create Defaults” will create waiter codes 01 – 99 instead of adding individual waiter names.
Function 30 Set Date and Time
You may have been prompted to set the ‘Date and Time’ when installing your terminal.
If you have set the ‘Date and Time’, the terminal will automatically adjust for ‘Daylight Saving’.

However, if you have a need to amend either of them this is achieved as follows:
Press the button until the ‘Application Menu’ is displayed and enter the Function Code 30 as described previously.

Press if the date is correct or type in the correct date (ddmmyy) and then press .
Date will be overwritten as it is typed.

Press if the time is correct or type in the correct time (hhmm) and then press .
Time will be overwritten as it is typed.

Alternatively, you may access the ‘Set Date/Time’ function via the ‘Admin’ option in the ‘Application Menu’ described later in this manual.
Supervisor Menu

If you know your ‘Supervisor Code’ but wish to change it; press \( \uparrow \) until the ‘Application Menu’ is displayed. The following screens will be displayed:

1. Touch ‘Supervisor Menu’ to select it.

2. Touch ‘Supervisor Code’ or press \( \uparrow \) to select highlighted option.

3. Press \( \uparrow \) if you wish to change your ‘Supervisor Code’ or press \( \uparrow \) to exit without changing it.

4. Enter your current code and then press \( \uparrow \). Use \( \downarrow \) or \( \uparrow \) to correct mistakes.

5. Type in new ‘Supervisor Code’ and then press \( \uparrow \) to confirm.

6. Re-type in new ‘Supervisor Code’ and then press \( \uparrow \) to confirm.

7. Press \( \uparrow \) to confirm code change.

The above process is the same as if you had performed a ‘Function 34’ from the ‘Helpdesk Menu’.
**Network Setup**

Press \( \text{\textacm} \) until the ‘Application Menu’ is displayed.

1. Touch ‘Network Setup’ in the menu to select it.
2. Enter your ‘Supervisor Code’ and then press \( \text{\textacm} \).
   Use \( \text{\textacm} \) or \( \text{\textacm} \) to correct mistakes.
3. Touch ‘Network Manager’ to select it.
4. Touch the required interface to highlight it.

Press \( \text{\textacm} \) to enter ‘Setup Mode’ for the selected interface.
Press \( \text{\textacm} \) to exit the function.
Press \( \text{\textacm} \) to disable the interface.
Press \( \text{\textacm} \) to enable the interface.

The interface icon will be blue \( \text{\textacm} \) Bluetooth if enabled, or grey \( \text{\textacm} \) Bluetooth if disabled.

Note: If there are more Networks available than can be displayed on a single screen, a scroll bar will be visible on the right hand side of the display.
You should scroll the menu as described earlier in this manual to view the other available options.

You may now configure your network settings, especially any you postponed during the installation process.
**WiFi**

1. Press ☐ to setup ‘WiFi Interface’.

2. Press ☐ to start to create a ‘WiFi Profile’.

3. Touch the screen to select the preferred method.

**WiFi (Automatic Scan)**

1. The terminal will scan for and list all the available networks.

2. Touch the screen to select the required network.

3. Touch the screen to select the correct security for the selected network.

4. Type in the network password and then press ☐ to confirm.

5. Touch the screen to select the required network.

6. The new profile has been created.

7. Press ☐ to confirm.

8. Terminal will display a ‘WiFi Profile Menu’.

---

**Note:**

- WiFi (Automatic Scan) is only available for terminal models with the R102, R104, Z104, and Z106 option cards.
- The availability of the WiFi interface depends on the model type of the device.
WiFi (Manual Scan)

1. Touch the screen or press \( \text{Next} \) to select highlighted option.

2. Type in the network name and then press \( \text{Next} \) to confirm.

3. Touch the screen to select the correct security for the selected network.

4. Type in the network password and then press \( \text{Next} \) to confirm.

5. The new profile has been created. Press \( \text{Menu} \) to confirm.

6. The terminal will display a ‘WiFi Profile Menu’.

WiFi (Active Profile)

1. The terminal will display a list of WiFi Profile Sub Menus. Touch ‘Active Profile’ on the menu.

2. Touch screen to highlight and select required option or press \( \text{Next} \) to select highlighted option.
**WiFi (Modify Profile)**

The terminal will display list of WiFi Profile Sub Menus. Touch ‘Modify Profile’ on the menu.

Touch profile on screen to be modified or press ✅ to select highlighted option.

Continue as previously described above for creating new profiles.

**WiFi (Delete Profile)**

Touch the screen to select ‘Delete Profile’.

Press ✅ to confirm profile to be deleted. Or press ▼ to exit without deleting profile.

Touch the screen to select the profile to be deleted.

Touch screen to select an option or press ▼ to exit.
Mobile (GPRS Setup)

Set Mode

1. Press 🔄 to ‘Setup’ your ‘Mobile Interface’.
2. Touch ‘Set Mode’ on the screen to select it or press 🔄 to select highlighted option.
3. The terminal will display current mode.
   Press 🔄 to accept or 🚫 to change mode.
4. Terminal will scan for networks if 🚫 was pressed.
5. List of available networks shown. Touch preferred network on the screen to select it.
6. The terminal will attempt to register with the selected network.
7. Confirmation of registration with the selected network.
   Press 🔄 to acknowledge.
8. Terminal returns to ‘Setup Menu’.
   Press 🚫 to exit the function or choose another option.

The terminal will now remain in ‘Manual Mode’ until you re-select ‘Automatic Mode’ by repeating steps 1 – 3.
Signal Strength
May be used to test the strength of the GPRS signal in poor reception areas.

1. Touch ‘Signal_Strength’ on the screen to select it.
2. Terminal will display strength of signal as you move about. Press \( \rightarrow \) to exit function.

Print Cell Info

1. Touch ‘Print Cell Info’ on the screen to select it.
2. GSM Cell Information is printed. and the terminal returns to the ‘Idle Screen’.

GSM CELL INFORMATION
----------------------
Network Name: O2 - UK
Cell ID: 60830567
Local Area Code: 21928
08:45 13/03/19
Bluetooth
Bluetooth (Assign to Base)

1. Press \( \text{ Assign to base } \) to select ‘Assign to base’.

2. Place the handset on the base and press \( \text{ Assign to base } \).

3. The handset will attempt to connect with the base unit.

4. If the terminal has successfully paired with the base unit, press \( \text{ Assign to base } \) to acknowledge.

Bluetooth (Select Base)

1. Touch ‘Select Base’ to select it.

2. Touch screen to select base. Base number is last 8 digits of serial number on underside of base.

Bluetooth (Remove Base)

1. Touch ‘Remove Base’ to select it.

2. Touch the screen to select the base to be removed.
**Ethernet**

Selecting ‘Ethernet’ from the ‘Manage Interfaces’ menu will display the ‘IP Configuration Menu’:

**IP Configuration Menu**

Note: The following options are **only** applicable if the terminal is in ‘Static Mode’, they will have no effect on the terminal if it is configured in ‘DHCP Mode’.

You should only change this data on instruction from the helpdesk.

1. Touch the screen to select an option or drag the scroll bar to view other options.

2. Touch the screen to highlight the required option.

**Save Settings**

1. Touch ‘Save settings’ on the screen to save the changes.

2. The settings will be saved.
Mode
You may configure the terminal to use DHCP or Static IP addresses. The initial screen will display which mode you are in.

1. The terminal will display the current mode. Touch the screen to open the window.
2. Press to change to Static Mode. Press return to previous screen.
3. Press to change to DHCP Mode. Press return to previous screen.
4. Press to exit function.

IP
You may configure the IP address. The initial screen will display which IP address you are connected to.
Press to clear all digits.
Press to clear one digit at a time.
Press to confirm data.

1. The terminal will display the current mode. Touch the screen to open the window.
2. Enter IP address: 10.16.80.73
3. Press to confirm address or clear the digits and re-enter new address.
**Mask**
You may configure the Mask address. The initial screen will display which Mask address you are connected to.

1. Touch screen to select ‘Mask’ or press to select highlighted option.
2. Press to confirm address or clear the digits and re-enter new address.

**Gateway**
You may configure the Gateway address. The initial screen will display which Gateway address you are connected to.

1. Touch screen to select ‘Gateway’ or press to select highlighted option.
2. Press to confirm address or clear the digits and re-enter new address.

**DNS1**
You may configure the DNS1 address. The initial screen will display which DNS1 address you are connected to.

1. Touch screen to select ‘DNS1’ or press to select highlighted option.
2. Press to confirm address or clear the digits and re-enter new address.
DNS2
You may configure the DNS2 address. The initial screen will display which DNS2 address you are connected to.

Touch screen to select ‘DNS2’ or press ← to select highlighted option.

Press ← to confirm address or clear the digits and re-enter new address.

PING
It is possible for the terminal to ping an IP address.

Touch screen to select ‘Ping’ or press ← to select highlighted option.

Press ← to ping the address or clear the digits and re-enter new address to ping.

MAC
The screen will display which MAC address you are connected to.
ADMIN
Merchant Info Display

Press 📏 button. Terminal will display ‘Terminal ID’ and ‘GEMS Merchant ID’.

Press 📏 button to continue or press 📏 button to print short report.

Reset MAC Key

Press 📏 button, terminal will prompt for ‘Supervisor Code’.

Press 📏 to reset the MAC key or press 📏 to return to ‘Admin Menu’.

Note: If more than one acquirer is configured, the above screen will display the acquirer name. Each time 📏 is pressed the next acquirer will be displayed.
Terminal Information

Press ➤ button and a ‘Sub Menu’ will be displayed. Press ➤ to exit function.

Print Configuration

Press ➤ button to select highlighted option. Press ➤ to exit function.

Press ➤ button to print ‘EFT Configuration’, press ➤ to skip or press ➤ to exit function.

Gently touch on the screen with your stylus or a pen.
Screen will change

Gently touch on the screen with your stylus or a pen.
Screen will change

Press to complete process and return to the ‘Idle Screen’.

This screen will be displayed if calibration failed.
Repeat steps again taking care to touch the .
Backlight Setup

1. Touch ‘Backlight setup’ on the screen to open the window.

2. Key in backlight duration is seconds and press  to submit value.

3. Key in the backlight intensity and press  to submit value.

Typing value will overwrite existing value. To correct mistakes when entering data press  to delete one character at a time or press  to delete all data entered.

Set Date/Time

1. The terminal will display the current mode. Touch the screen to open the window.

2. Press  if date is correct.

3. Press  if time is correct.

Typing value will overwrite existing value. To correct mistakes when entering data press  to delete one character at a time or press  to delete all data entered.
Recommendations

Safety

Powering down the Move/5000

• Disconnect the Move/5000 power supply block adapter from the electrical mains network
• Turn it off by simultaneously pressing ☐ and ☐ for one second.

Lithium cell

• The Move/5000 is fitted with an internal lithium cell which can only be accessed by a qualified technician

Battery

• The Move/5000 is fitted with a battery specifically designed for this terminal
• Only use appropriate chargers and batteries listed in the Ingenico catalogue
• Do not short-circuit the battery
• Do not attempt to open the battery container
• Used batteries must be disposed of at appropriate sites

There is a risk of explosion if the battery is incorrectly inserted or placed in a fire

Electrical power outlet

The electrical power outlet must meet the following criteria:
• Must be installed near the equipment and easily accessible
• Must meet the standards and regulation in the country where used
• The fuse rating for this terminal must be 5A.
SAM1/SAM2/SIM1/(SAM3/SIM2) readers compartment

- The back cover for battery and SAM / SIM readers located underneath the terminal, must be in place during the normal operation of the terminal. See as well as ‘Installing the battery’.

On airplanes

- Remove the battery from the terminal when on an airplane.
- Non-compliance with these safety rules may result in legal action and/or a ban on later access to cellular network services.

Explosion areas

- Certain regulations restrict the use of radio equipment in chemical plants, fuel depots and any site where blasting is carried out. You are urged to comply with these regulations. The terminal is protected by a specially fitted and certified cover enabling use in proximity to a fuel pump.

Electronic health appliances

- The handset is a radio transmitter which may interfere with health appliances, such as hearing aids, pacemakers, hospital equipment, etc.
- Your doctor or the equipment manufacturer will be able to provide you with appropriate advice.

External connection

- All external circuits connected to the Move/5000 must be SELV (Safety Extra Low Voltage) and LPS (limited power source) within the meaning of section 2.2 and 2.5 of the standard IEC60950 - 1:2005+/A1:2010 and EN60950 - 1:2006+/A11:2009+/A1:2010+/ A12:2011

Cleaning

- To clean the terminal, use a soft cloth slightly moistened with water. Do not clean the electrical connections.
- Do not use solvents, detergents or abrasive products.
The power supply contains the following symbols:

- **Double insulation symbol**
  Marking for Class II product. Such product does not require a safety connection to electrical earth

- **DC current output**
  This marking indicates that your terminal is suitable for direct current (DC) only. It is completed by afferent values (voltage, and max current)

- **AC current input**
  This marking indicates that the product operates with an alternating current (AC) source (mains). It is completed by afferent values (voltage, frequency, max current)

- **DC power jack polarity**
  Output plug is Positive (+) and the barrel (ring) of the output plug is Negative (-)

- **Indoor use only**

- **Energy star level 6**
  International efficiency marking protocol

**Environment (WEEE, batteries and packaging)**

This product is labelled in accordance with European Directives 2002/96/EC concerning Waste Electrical and Electronic Equipment (WEEE) and 2006/66/EC concerning Batteries and Accumulators. These provisions require producers and manufacturers to become liable for take-back, treatment and recycling upon end of life of equipment and batteries.

The associated symbol means that WEEE and waste batteries must not be thrown away but collected separately and recycled.

Ingenico ensures that efficient collection and recycling schemes are set-up for WEEE and batteries according to the local regulation of your country. Please contact your retailers for more detailed information about the compliance solution in place for disposing of your old product and used batteries.

Packaging waste must also be collected separately to ensure proper disposal and recycling.

Please note that the proper recycling of electrical or electronic equipment and waste batteries will ensure the safety of human health and the environment.
Security of the Terminal

This device fulfils current applicable PCI PTS security requirements. Upon receipt of the terminal you should check for signs of tampering of the equipment. It is strongly advised that these checks are performed regularly after receipt.

Check, for example: that the keypad is firmly in place and that there is no evidence of unusual wires that have been connected to any ports on the terminal or associated equipment. Also ensure that the chip card reader or any other part of the terminal has not been modified.

These checks should provide warning of any unauthorised modifications to the terminal, and any suspicious behaviour of individuals that have access to your terminal.

The terminal detects any ‘tampered state’ and will repeatedly flash the message “Alert Irruption!” and further use of the terminal will not be possible.

If the “Alert Irruption!” message is observed, contact the terminal helpdesk immediately.

It is strongly advised that privileged access to the terminal is only granted to staff that have been independently verified as being trustworthy.

The terminal must never be put in or left at a location where it could be stolen or replaced by another device.
Standards

CE Mark

The CE marking indicates Move/5000 complies with the requirements of European Directive 1999/5/EC of 9 March 1999 on Radio and Telecommunications Terminal Equipment for:

- The protection of the health and the safety of the user and any other person.
- The protection requirements with respect to electromagnetic compatibility.

Troubleshooting

The terminal does not turn on
• Connect terminal to terminal power supply or put it on powered base.
• Check the battery (is it discharged? is it connected?)
• A full discharged battery can take a long charging time to recover

Cards are not read
• Check that the magnetic card is swiped correctly (with magnetic strip facing the side of the terminal).
• Swipe the card again with a continuous and fluid movement
• Verify that the magnetic strip is not damaged, grooved or cracked
• Make sure you have correctly inserted the smart card into the smart card reader and only removed it when prompted to do so.

The receipt is not printed
• Check the presence and proper positioning of the paper roll.
• Adjust the paper roll following the instructions in this manual (See ‘Installing a paper roll’).
• Check that Ingenico approved thermal paper has been used.
