

Moby/5500 Series

**A versatile range of compact card readers
to accept all transaction types**

- Accepts all card-based payments: EMV, magstripe and NFC/contactless
- Secure card reader available in two versions: Chip & Sign or Chip & PIN
- PIN on Mobile Ready
- PCI-PTS 5.x certified to meet the latest security standards
- White-label options for custom branding

This new generation of mobile card readers enables merchants, Independent Software Vendors (ISVs) and developers to go-to-market quickly with a PIN on Mobile-ready secure payment acceptance solution built to create versatile and flexible checkout experiences for shoppers.

Secure Payment Flexibility

The Moby/5500 accepts all card-based payments, including EMV Chip & Sign, EMV Chip & PIN, NFC/contactless and magstripe. With a built-in extended battery, this device is capable of hundreds of EMV transactions on a single charge.

It is certified for PCI PTS 5.x SRED, EMV L1 and L2, EMV L1 contactless, Visa payWave, Mastercard Contactless, Amex Express Pay, Discover D-PAS and CUP qUICS.

PIN on Mobile

Integrated with back-end monitoring and a PIN CVM app, the Moby/5500P Secure Card Reader for PIN (SCRP) variant gives payment providers the ability to meet PCI standards and allow PIN on Mobile.

Merchants benefit from a compact, lightweight device that enables PIN entry on their smartphone or tablet. Card holders insert their card in SCRCP and enter their PIN on the merchant's mobile device in a fully secure payment environment.

Versatile Design

The Moby/5500 offers a neat and scalable design. It also includes multiple contact pads and a USB-C connector to simplify integration with a large array of peripherals, smartphones, tablets and accessories.

White-label options allow customized branding on the front of the device.

Easy Integration

The Moby/5500 is compatible with iOS, Android and Windows. It connects easily via Bluetooth with over 500 iOS, Android and Windows smartphones and tablets.

The Moby/5500 leverages a mature platform by combining Ingenico's mPOS EMV Software Development Kit (SDK) with a single generic PIN pad application.

NAME		Moby/5500 (SCR variant)	Moby/5500P (SCRCP variant)
