iCMP122 Product Line (PCI-PTS v3.x models)

US Product Management
Ingenico Group, North America

September 30th, 2017

1 Announcement

The purpose of this notice is to advise that Ingenico US is announcing a withdrawal from marketing and sale of the PCI-PTS v3.x models of the iCMP122 in the US.

The relevant dates and support commitments are detailed below.

Impacted product models include, but may not be limited to:
- ICM122-31P2648

Please note that all revisions within said part numbers are included in this notice. For example, ICM122-31P2648 includes ICM122-31P2648A, ICM122-31P2648B, etc.

As this is the EOL of the iCMP122 product line, please note that any and all product specific accessories (eg. PSUs, cables, etc.) are included as part of this EOL

2 Rationale

Payment devices (hardware) and POS applications (software) are evolving technologies. They follow a natural product life cycle. Payment hardware is primarily governed by the Payment Card Industry Security Standards Council's (PCI SSC) regulatory compliance requirements, EMVCo and Card brand requirements, in addition to market activity and market demand.

Ingenico US is taking the action to EOL the PCI-PTS v3.x iCMP122 listed above due to the replacement product having vastly improved performance, includes new functionality needed by the market, while being certified to the latest security and card brand specifications.
