Business Reasons

Payment hardware and software are some of the fastest evolving technologies in the world. They follow a natural product life cycle which is determined by market demand and increasingly stringent regulatory compliance requirements. In response to these factors, Ingenico is offering its customers the most advanced terminals on the market via its Telium 2 line. The company has invested heavily in its new Telium 2 technology platform to upgrade its existing line of products with the next generation of high performance wireless payment terminals.

Key Milestones and Dates

The EOS and EOL transition period for the Ingenico EFT930G Wireless Payment Terminal is October 11, 2011 through March 31, 2015. The last day to buy i.e. final forecast for these terminals is March 31, 2012 and the PO's for the forecasted devices are due by June 30, 2012. Customers with active service contacts will continue to receive warranties and services support from Ingenico as specified by terms and conditions in their contracts through March 31, 2015. Table 1 describes the EOS and EOL key milestones and dates.
